THE HOLLAND NURSERIES

U. S. Department of Agriculture.
RECEIVED
SEP 27 1920

CASTLE HAYNES, N. C.
(NINE MILES FROM WILMINGTON)

H. VAN NES, . . . Proprietor

Fruit Trees: Evergreens
Shade Trees: Hedging
Roses: Shrubs: Etc.

All stock guaranteed to be in good condition when delivered to transportation company, where our responsibility ceases.

A certificate of inspection is furnished with every shipment. All claims must be made within 24 hours after receipt of plants.

All our plants are home grown, or those imported have been tried out and acclimated for the last one or two years, which reduces loss through transplanting to the minimum.

We do not sell any plants, trees or shrubs which will not grow in this climate.

Lovers of flowers and customers are cordially invited to visit the nurseries, where they will see the stock growing in healthy condition and are guaranteed courteous treatment. Out-of-town people will be met at the depot, if informed beforehand.

We will be glad to quote you prices on laying out orchards, setting out hedging, laying out yards, etc.

12 plants of one variety will be given for the price of 10.

SPECIAL PRICES for LARGE QUANTITIES

EVERGREENS

We have a nice collection of evergreens and only mention a few of them.

		Price Each
Deodar Cedar -----	18 to 24 in.	.75

TO OUR CUSTOMERS:—

We hereby beg to hand you a short descriptive list of our 2 to 3 years old, strong and healthy roses grown at Castle Hayne, N. C., and advise you to order early so that plants can be set out in Fall, instead of Spring which gives so much dissatisfaction. Hoping to be favored with your order.

Respectfully yours,

THE HOLLAND NURSERIES.

Devoniensis, strong plants-----	.50
Robert Peary, climbing Kaiserin, strong climbing habit-----	.50

STANDARD OR TREE ROSES

Tree roses occupy but little space and are very imposing when planted among shrubbery or perennials. Along the side of a walk they form an avenue effect. The plants we offer this year are exceptionally choice with sturdy roots and well balanced tops. For best results the weak shoots should be cut out in the spring before growth starts, and the stronger ones pruned back to 3 or 4 eyes each.

Prices of all except noted from .75 to \$7.50 per dozen. Budded 3 to 4 feet high

Frau Karl Druschki (White American Beauty)-----

FRUIT TREES

Our fruit trees are all clean, healthy stock, grown at our nurseries Castle Hayne, N. C. Your success or failure of fruit growing depends largely on the quality of the young stock you set out. Look at our fibred, healthy root system, the strong one and two year old stock. The first year our fruit trees grow to be 6 to 7 feet, even our peach trees 5 to 7 feet, which takes 2 years in most other nurseries. We also

have tried what varieties are doing the best in Eastern North Carolina Buy our stock or ask for a sample, which will make you buy. If not entirely satisfactory, trees can be returned.

Give us a trial. Those intending to give a large order, we would advise to visit our nurseries.

Special prices for large quantities.

		Price Each
1 year old apples	-----	.20
2 year old apples	-----	.30

APPLES

Red Astracan, large, pretty, deep crimson, early summer, acid.
 Early Harvest, productive, medium, yellow, very good, early summer
 Red June, one of the best medium sized, early summer apples, early market
 Yellow Transparent, earliest and best, white, tender, juicy, subacid
 Bonum, medium fruit, yellow with crimson spots, flesh white, subacid, very good, fall
 Gravenstein, productive, flavor aromatic, subacid, yellow, striped with red and orange, fall
 Ben Davis, medium, smooth, yellow with bright and red stripes, flesh firm, winter
 Horse, medium, red blushed, flesh tender, subacid, winter

PEARS

Bartlett, fruit large, flesh white, buttery, juicy, sweet, very good, late summer
 Le Conte, fruit large, surface yellow, flesh whitish, melting, flavor fair, very resisting of blight, midsummer.
 Smith, fruit large, surface yellow, with red blush, flesh whitish yellow, tender, vinous, subacid, resistant of blight, fall
 Kieffer, fruit large, surface yellow, netted russet, flesh whitish, coarse, juicy, sweet when fully ripe, late fall, very resistant of blight
 Garber, fruit large, surface brownish-yellow, flesh firm, juicy, acid, late summer, very resistant to blight

Duchusse d'Angouleme, September and October, a favorite and of excellent quality, fruit large, yellow with some russet, buttery, and finely flavored
Sheldon, hardy, fruit large, greenish yellow with thin russet, flesh whitish, juicy, melting, flavor sweet, very good, fall

PEACHES

Mayflower, fruit medium, oblong, high color, excellent quality, very early
Carman, fruit large, pointed, white dotted with red, flesh creamy white, flavor vinous, pitfree, early
Greensboro, tree hardy, fruit large, round, surface yellow with red and crimson cheek, flesh white, very juicy, sweet, pitfree, early summer.
Belle of Georgia, tree hardy, fruit large, roundish, surface whitish with red cheek, flesh white, firm, flavor excellent, pitfree, July
Elberta, tree strong, prolific, fruit large, roundish, surface yellow with red cheek, flesh yellow with red at pit, juicy, flavor rich sweet, pitfree late summer. Would not advise, too near the coast.
Japanese Persimon (*Diospiros Kaki*). It will be only a few years, when the demand for this fruit will be bigger than the supply. Get ready and set out an orchard. They grow on any land, even too poor to grow any other crop. Our trees are good sized and healthy. Set out early.
Hacheya, very large, oblong, with sharp point, diameter 3 inches. weigh sometimes 1½ to 2 lbs., reddish yellow, flesh dark yellow, few seeds, vigorous grower
Tana-Nashi, the best known variety, large conical pointed, very smooth, 3½ to 4 inches diameter, light-yellow, seedless, quality fine, bears second year early September, fine for market.
Zengi, although one of the smallest is one of the best 2½ inches diameter, reddish yellow, dark meat, edible while quite hard, August till December.

PLUMS

Abundance, medium to large, greenish-yellow, subacid, rich and good, abundant bearer
Burbank, fruit large, deep maroon red, flesh firm and yellow, small pit, excellent keeper.
Red June, early plum, free from rot, dark red, fine for canning, grows everywhere.

FIGS

Diversify your crop. Have an acre in figs for canning. Always a good market for fresh figs. They are healthy and desirable for the table.
Brown Turkey, medium size, yellowish-brown, tender, rich, sweet, fine quality, very prolific, bears second year
Brunswick, fruit large, dark violet, skin thin, flesh white to pink around seed cells, sweet, juicy and rich, in good soil bears one year after planting
Celestial (sugar Fig), medium to small, violet-yellow, rich and tender, very sweet, hardiest of all, used chiefly for canning, bears 2 years after planting, very prolific
Green Iachia, green, flesh white to crimson around seed cells, medium to large, very prolific, next in hardness to Celestial
Pecans are coming evermore in demand. In town it is a pretty, paying shade tree; on the farm it means big future profits. Keep the nests burned out.
Schley, tree thrifty, productive, nut medium, oblong-ovoid, shell very thin, partitions thin, kernel plump, sweet, rich, excellent, early.
Stuart, tree thrifty, prolific, nut large, ovoid, shell thin, partitions thin, kernel plump. flavor good; early
Van Deman, tree vigorous, productive, nut large, oblong pointed, shell thin, kernel rather plump, flavor good; early.

CHERRY

Though we do not recommend the cherry for Eastern North Carolina, we have had so many demands, that we carry a few of the sour cherries in stock. Plant them in rich soil and keep them clean.

Morello, tree very hardy, productive, fruit medium, roundish surface bright red, flesh light colored, juicy, flavor brisk, acid very good; early.

Early Richmond, tree hardy, productive, fruit medium round, skin light red, flesh soft, uncolored, flavor rich, acid, very good; early.

GRAPES

Bunch Grapes

There are several varieties of bunch grapes that bear well in the South and very profitable for local market. They make excellent jelly, preserves or wine and eating fresh.

Price 2 years .20, 3 years,.35.

Catawba, medium, large red of good quality, very late. Special for North Carolina.

Concord, blue-black berry of large size and large bunches, flesh pulpy, sweet, tender, desirable for nearby market, but too tender for long shipments.

Delaware, berries small, reddish or pink, quality good, medium bunches.

Niagara, large, greenish-yellow berries, in large bunches, quality excellent, early and productive. A fine market variety, one of the best.

Muscadine Grapes

The scuppernong grapes are at home in North Carolina, heavy bearers and rank growers; good for jelly, preserves, wine and fresh eating. Should be raised on arbors 15 to 25 feet apart. Requires no pruning.

Eden, berries black, medium size, good wine grape, bears early, very productive.

James, very large, black berries, sweet, juicy, excellent. The largest and one of the best, ripens August till fall. Good shipper.

Scuppernong, large, greenish-yellow berries, bronze colored when fully ripe, sweet, quality excellent, August-September.

Price 1 year .15, 2 year,.25.
